## IDM 6xx Patch BabelPatcher

23 October 2559 BC - My IDM installation is currently giving me fake serial dialogs. I am using TR from @babelpatcher. But the problem was before. I used .NET to do some stuff like .NET WCF etc that I couldn't get it to run in TR. I just couldn't figure out why TR wouldn't let me use .NET. But I was able to use it for everything else. I should have known that TR is not .NET. So I had to realize that he never let me use .NET. And I was able to figure it out. Here are my attempts. I got it but I'm not sure how IDM works. It has to do a lot of things, and I can't find them in the documentation.
