KeyMacro is an advanced solution for using hotkeys with both Windows and Apple applications. It helps you quickly and easily launch applications, control system functions, and more, with a single hotkey. The program supports eight different hotkeys, and also lets you assign the behavior of various applications as well as add hotkeys to your favorite web-based applications. In addition, KeyMacro can generate a reminder of the last key pressed, and can even save your macros and hotkeys automatically to a file. Keymacro Key-Sequences: Hotkey: Press and hold the specified key on your keyboard until the specified event occurs. Automatic hotkey: Start a specific hotkey program on your PC after a specified time period, such as two minutes. Timer: Delay a program for a certain time period after you press the Hotkey key. Ribbon: The program adds a specific key shortcut to a specific application's task bar button, so you can quickly access an application by using a hotkey. Automatic ribbon: Add a specific key shortcut to a specific application's task bar button, so you can quickly access an application by using a hotkey. Interval timer: When you press the Hotkey key, the program automatically runs a specified program and then automatically stops it after a specified time period. Application register: Add a specific key shortcut to a specific application's task bar button, so you can quickly access an application by using a hotkey. Key board layout: The program supports the traditional English and German keyboard layouts, and also supports the Italian, French, Brazilian, Spanish, Russian, and Polish keyboard layouts. Macros: Create macros for sending keystrokes to the Windows System Tray. The program comes with several free and paid application icons so you can use a keystroke to perform various actions with your favorite application. Create keystrokes to copy, cut, paste, and extract files to the system tray or clipboard. Save keystrokes to the keyboard for easy recall. Add hotkeys to your favorite web-based applications. Create macros that perform actions in your web-based applications. Make Windows applications behave like an Apple Mac. Add hotkeys to your favorite web-based applications. Choose which applications you want to hotkey, which keystrokes you want to assign to the hotkeys, and which action you want to perform. Video to MP3 Converter Free is a small Windows application designed specifically for helping you extract the audio streams from various video files, such as AVI, MPEG, MPG, MKV, or WMV file format. User-friendly layout The layout embeds only a few dedicated parameters, which can be easily tweaked even by less experienced users. You can upload the videos in the working environment using the built-in browse button, so you cannot rely on the drag-and-drop support. Additionally, you can view information about each file added to the list, such as file location, size, and status, remove the selected items, as well as clear the entire list with just one click. Conversion capabilities Video to MP3 Converter Free gives you the possibility to choose the saving directory and select the desired output format from a drop-down list, namely MP3, MP2, WAV, WMA, OGG, FLAC, AC3, or AAC file format. When it comes to audio configurations, you are allowed to select the bitrate from a preset list, choose the sample frequency, pick the audio channels, as well as increase the audio volume to a user-defined value. The tool offers support for batch processing, which means you can add multiple audio files and process them at the same time. Additionally, you may stop the conversion operation and open the target location where the converted audio files are stored directly from the primary panel. Configuration settings and performance The program lets you shut down the computer at the end of the task and play sound notifications when the conversion process comes to an end and a new update is available. Tests revealed that Video to MP3 Converter Free carries out the conversion operation quickly and provides very good audio quality. It doesn't eat up a lot of CPU and memory, so the overall performance of the computer is not hampered. Bottom line All in all, Video to MP3 Converter Free offers a simple yet efficient software solution for helping you extract the audio streams from different video files.
