direct method for the determination of the optical rotation of chiral terpenes by microscopy. A direct method to quantify the absolute optical rotation (OA) of chiral molecules is described. A solution of chiral terpene is mixed with a solution of polarization-sensitive dye in a microcell cuvette. When the molecules diffuse, a differential absorption of the dye is expected for the chiral solution as compared with the achiral one. The experimental results are directly obtained from optical images, obtained by polarization-resolved two-photon excitation fluorescence microscopy.

Alcohol-induced increase of neuronal nitric oxide synthase is mediated by a pertussis toxin-sensitive G-

protein. The effects of alcohol on neuronal nitric oxide synthase (nNOS) expression and function were examined in primary cultures of cerebellar granule cells. Alcohol increased the synthesis of nNOS mRNA and protein, the activity of nNOS, and the release of nitric oxide (NO) from these cells in a time- and concentration-dependent manner. The increased synthesis and activity of nNOS appear to be due to the action of alcohol-sensitive G-protein(s) because pretreatment of cells with pertussis toxin (10 ng/ml) for 24 h reduced the effects of alcohol on the activity of nNOS, the synthesis of nNOS mRNA, and the release of NO. Alcohol-induced increase of nNOS activity, but not its synthesis, was also abolished by hemicholinium-3 (Hem-3) (1 microM), a blocker of choline transporter, in cells pretreated with and cultured without hemicholinium-3 for 24 h. Moreover, treatment of cells with ethanol increased the content of glutamate and [(3)H]aspartate released from cultured cerebellar granule cells, which was attenuated by Hem-3. These results suggested that alcohol-

induced increase of nNOS activity was associated with the release of glutamate from cultured cerebellar granule cells, and this increase may be due to the activation of ch

This game is like a cross between Final Fantasy and

something like Dark Souls, but they both mix well because the combo gives the game a good sense of weight and the experience of a good RPG. In my opinion, this one makes the strong play style from Dark Souls stronger. - Review by Falssa (Hungry Hamster Games) Through a calm and retro atmosphere, it is easy to enjoy the game and feel a good sense of accomplishment on completing the game. The game is designed in such a way that you can really enjoy the game even when you die. But I feel as though the game may not be able to hold your attention for a long time, so I recommend not playing it if you can't manage to relax and focus on the game. - Review by ZUNTO TOEi (MAGES.UA) The RPG-like setting brings back the good memories of classic role-playing games, such as Final Fantasy. It is enjoyable and it's definitely worth it to play. - Review by hamzako (Egg Chain) Read full review: THE NEW FANTASY ACTION RPG.
