I've always been drawn to the idea of beginning a foundation, and I've always been overwhelmed with so many options that it's hard to know where to start. This book provides a great method to guide us through the process of decision-making and selecting the best vehicle, and how to approach the most-interconnected people on the planet, so that they'll want to work with you. It's a fun read, but it's also very practical. I would also recommend looking into Michael's career as a writer (read Empire and The New Cold War) and understanding how to use it as a blueprint for your own work. This book is a great addition to any library, and I highly recommend it. almost non-Euclidean geometry, which with time has the name of "generalized cosmology" and concerns the evolution of both the universe and man as the same beings, which evolve in the same way, to a point where man begins to physically modify their micro-environment, and their particular system of space, with the creation of various shelters. None of these shelters have an absolute consistency, and all of them take into consideration different ways of being that can have a

tiveProjectsQ: Bootstrap CSS styles lost after page refresh I am using Bootstrap for my webapp. However after some time, when i refresh the page, the CSS styles are lost. I used my codes in global.css file. How can i refresh my page and not lose the styles. A: You could use the.htaccess file to set the cache-control headers. The default is set to no cache and is usually set to maxage 1 in production. Set your response headers to cache maxage 1 # Turn on Expires headers Header set Cache-Control "max-age=1, public"

Set custom headers Header set Expires "Fri, 26 Jun 2013 22:05:55 GMT" This is the reason you do not see the page source when you refresh the page. .1 (264-512)
